# Introductory

The present volume for 1952 is the 24th edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social, and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

## THE DEPARTMENT OF MISCELLANEOUS INFORMATION

THE DEPARTMENT OF MISCELLANEOUS INFORMATION starting on page 5 contains information about Civic History and Industry, as well as a complete list of Apartment and Business Blocks.

## THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE starting on page 25 features the names of all streets and avenues arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

△ Denotes that there is a Telephone in the house.

◆ Denotes that someone living in the house is the owner.

## THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens and their wives, business firms and corporations starts on page 87.

## THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED BUSINESS DIRECTORY at the back of the book exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry or profession followed.

## LETHBRIDGE POPULATION, in excess of 22,800

The Directory estimate of population is based on the actual number of individual's names in the Alphabetical section of the Directory, with due allowance for children and for women whose names are not listed. The Lethbridge Directory covers considerable territory beyond, but tributary to the city limits, which is canvassed in order that the names of all people employed or who purchase in Lethbridge may be obtained.

## ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully,

The Publishers,

HENDERSON DIRECTORIES LIMITED.

June, 1952

## "THE IRRIGATION CENTRE OF CANADA"

(By courtesy of the Lethbridge Chamber of Commerce)

### LOCATION

Lethbridge is a divisional point on the Crow's Nest Pass line of the Canadian Pacific Railway to Vancouver, 125 air miles southeast of Calgary, 475 air miles east of Vancouver and 700 air miles from Winnipeg. It is on the Oldman River immediately above the site of Coal Banks, where Nicholas Sheran, Alberta's first miner started working on coal facings in 1872. This name was changed in 1885 in honor of William Lethbridge, first president of the North-Western Coal and Navigation Company, which company developed the coal properties at Coal Banks. This exploitation was carried out upon the recommendation of Elliott T. Galt, son of Sir Alexander Galt, one of the fathers of Confederation, and the name of Galt has been associated with the city ever since.

### PROGRESS

Lethbridge achieved the dignity of a town in 1891, its first mayor being C. A. Magrath, who was also the first president of the Lethbridge Board of Trade. The town received its city charter in 1906, with a commission form of government being inaugurated in 1914. This was continued until 1928, at which time the managerial form of civic government was instituted and it is still in force.

### MUNICIPAL GOVERNMENT

The city council is elected by the popular vote of eligible voters, the mayor being chosen from the councillors at the first meeting of the new council each year. The public and private school boards are also elected by popular vote.

#### Municipal Ownership:

The city owns its own power, waterworks and filtration systems, and a modern sewage disposal plant. It also operates the local bus transit system.

#### Other Facilities:

The city and district is also served by natural gas and has more than ample coal supplies. Electricity is available at reasonable rates, supplied by the municipal power plant.

Communication is provided by the lines of the Alberta Government Telephones, whose Southern Alberta headquarters are in Lethbridge.

#### General Statistics for 1951:

Population (estimated) .....	22,800
Elevation (approximate) .....	2,983 feet
Area .....	6,400 acres
Postal Revenue .....	\$ 238,782.00
Mill Rate .....	53
Land Assessment .....	100%
Improvements .....	66 2/3%
Gross Funded Debt .....	\$ 2,512,780.00
Net Debt .....	\$ 2,372,847.65
Tax Levy .....	\$ 1,311,456.80
Bank Clearings .....	\$ 178,854,406.45
Building Permits .....	\$ 4,820,675.00

### AGRICULTURE

#### Wheat:

Harvest weather could not have been more adverse. Rain and snow from the middle of August when harvesting usually gets under way, right through to the end of the year resulted in heavy losses in both bushels and grade. But in spite

of this near disaster to wheat, South Alberta's biggest cash producer, 36,000,000 bushels had been harvested by the end of the year, and approximately another 8,750,000 bushels harvested this spring. The spring season was better than normal. As a 35,000,000 bushel crop is considered normal in the Lethbridge territory, the harvest result was better than usual in spite of the weather. That happy result came about only because of a couple of dry weeks during November, by which in ordinary years the grain is all safe in the elevators and bins. It is estimated that adverse weather conditions during the normal harvest season cost the farmers of Southern Alberta \$30,500,000. The bushelage was well above average, but 8,750,000 bushels was left laying under the snow. Practically no No. 1 wheat came from the machines last fall; a small percentage was No. 2, while No. 3 and No. 4 wheat was in fair proportion, but a lot of this was tough or damp and had to be dried. The wheat was high in milling content. Wheat lost due to the storms will be about 10,000,000 bushels. The "pot was sweetened" by the payment on 1950 wheat and coarse grains participation certificates amounting to \$8,000,000 in the Lethbridge territory. This came from payments of 25 cents on wheat, 15 cents on barley and 10 cents on oats delivered during the 1950 season.

#### **Coarse Grains:**

Owing to heavy crops and high feed prices, coarse grains showed a gain over 1950. While a good share of them were harvester for grain, a lot of them were cut green for feed. Oats were estimated in August at 47.8 bushels per acre and barley at 44.7 bushels per acre, and the two would have made a crop of 26,993,000 bushels had the harvesting weather been normal. Rye and flax were not a large acreage, but most of these were harvested in good condition, selling at good prices. Flax at the end of the year was selling at up to \$4.90 a bushel.

#### **Dairying:**

Fluid milk purchased by distributing plants at Lethbridge was 7,373,642 pounds, an increase of 4.2% over the 7,077,846 purchased in 1950. Butter manufactured in Census Division No. 2 in 1951 was 1,058,444 pounds. This was a decrease of 4% compared to the 1,102,601 pounds manufactured in 1950. Cheddar cheese production showed a decrease of 7.7% over 1950. The increased consumption of milk can be attributed mostly to the increased population in Lethbridge. The decrease in butter and cheese production is a result of the tendency to milk fewer cows. The farmer has more remunerative aspects of his operation that do not require so much time and labour, and the trend is to sell dairy herds and go into beef cattle.

#### **The Dominion Experimental Station:**

Located just east of the city, was established in 1906 and has been a major factor in the agricultural development of Southern Alberta. The work of the Station has been greatly expanded in recent years to meet the demands for information on a diversity of problems. The Station now comprises about 1,100 acres on which investigations in both irrigated and dry land farming are conducted. Laboratories for cereal breeding, forage crops, wool research, and animal nutrition are in operation.

#### **Canada Science Service Laboratories:**

These laboratories, opened in 1949, consist of offices, laboratories with specialized facilities, greenhouses and experimental plots. The main buildings are situated immediately south of the Experimental Station. The Livestock Insect Laboratory is about a half-mile southwest of the main building and the Veterinary Research Station is located on the Oldman River, west of the City of Lethbridge.

The Field Crop Insect Laboratory, which has been located in Lethbridge since 1913, will continue research on insects affecting cereals, sugar beets, vegetables, forage and canning crops. In the past, work on the major insect problems has been directed from this laboratory, but now more intensive research will be conducted on these and new pests as they become a hazard to crop growing. Co-operative research on the development of sawfly resistant wheat is being intensively pursued by the plant breeders.

The Plant Disease Laboratory is carrying forward research on root rot of winter wheat and on diseases affecting alfalfa. They also are co-operating closely with the plant breeders in developing a wilt and crownrot resistant variety of

alfalfa. Annual surveys of plant diseases affecting all crops grown in the district are being conducted.

The Plant Physiology Laboratory will carry on research on various factors concerned with the resistance of cereals and forage crops to insect and disease pests and to winter hardness.

The Chemical Laboratory will carry on research on developing methods for analyzing plant material, etc., for assisting in the production of insect and disease, resistant varieties of cereal and forage crops.

The Livestock Insect Laboratory is a new entomological institution initiating research on insects affecting livestock production. Among the problems being studied are warble flies, horse flies, horse bots, lice and sheep keds.

The Veterinary Research Station is carrying forward research on various diseases affecting livestock and their control. The Cereal Breeding Laboratory, which is a division of the Experimental Farm Service, is housed in the Science Service Laboratories building. The cereal breeders are co-operating closely with the entomologists, pathologists, physiologists and chemists in the production of insect and disease-resistant varieties of crop plants, particularly cereals and forage crops, suitable for dry land and irrigation purposes.

### **IRRIGATION**

Irrigation development in Southern Alberta progressed as rapidly as weather conditions would permit. The season was the wettest on record with the exception of 1902 which had about the same precipitation for the year.

Sixteen contracts on the St. Mary Irrigation Project were awarded during the year for the construction of main canals and distributing systems. Also, ten contracts from the year before were completed in 1951. Due, however, to the backward season and to slow deliveries on materials, several of the sixteen contracts awarded in 1951 were not completed and will be finished in 1952. The following is a summary of progress during 1951.

#### **St. Mary Dam and Reservoir:**

The main earth dam was virtually completed in 1950. 1951 saw the completion of the spillway and the installation of valves and control works. The dam was officially opened by the Right Honorable J. G. Gardiner, Minister of Agriculture, on July 16th, after a struggle with the elements, in the form of floods, to have the structure ready for this occasion. The reservoir filled up to overflowing and the day of the official opening was a beautiful sunny one. The lake was full, with water going over the spillway and conditions were just right for such an occasion.

#### **Main Canals:**

Contracts were awarded during the year for the completion of the main canal from the St. Mary Dam to Forty Mile Coulee, just south of Bow Island. Much of this work had been done the year before, but a great deal still remained. 1951 operations nearly completed this unit, although some contracts were not completed and will be finished in 1952.

### **INDUSTRY**

#### **Mining:**

Coal was the prime reason for the settlement of Lethbridge, and it still plays an important part in its economy, there being over 500 miners employed in the mines at and near Lethbridge. It is estimated that there is a reserve of two billion tons in the deposits underneath Lethbridge, and the future use of these reserves is becoming a matter of concern to the mining industry as well as to those who realize to what extent coal is connected to the welfare of this district. It is to be hoped that extensive developments will be seen in the utilization of coal through processing into plastics and more efficient fuels, for which purpose Lethbridge coal is ideal.

#### **Oil:**

Southern Alberta figured importantly in the booming oil and natural gas picture in the year 1951. Highlighting development in the field was confirmation given the enormous wet gas reserves in the Pincher Creek mountain front field, 70 miles northwest of Lethbridge.

Canadian Gulf, which discovered the field, brought in its Gulf Bonertz No. 1 midway between the discovery and the Gulf-Marr "Wonder Well", and while its production has not been revealed officially, it is given a capacity rating up to 200,000,000 cubic feet, the biggest well in the field. Pincher Creek is awaiting a market for its dry gas, which will be available in large amounts after the gas as it comes from the earth is processed. Gulf has announced its plans for a \$20,000,000 investment in processing plant installations at Pincher Creek once it has an outlet for its dry gas.

During the year Pincher Creek light gravity oil (distillate) was marketed for the first time in limited quantities.

Barons field, discovered in 1950, continued to produce crude oil in 1951—14,345 barrels, practically all from the discovery well—but the drilling record was disappointing. Two producing wells were completed to make three in the field, along with a series of dry holes. A wildcat well was started at Carmangay, some 12 miles north of Barons, but it was not completed.

Del Bonita-Spring Coulee remained in the picture with a group of wells in the former area giving promise of being commercial wells from the Madison lime. Tests were being run as the year ended with the development program continuing in the New Year. West of Coutts, near the old producing Red Coulee field, a strike of crude oil was made and a second well offsetting No. 1, is planned. It is thought the structure straddles the Alberta-Montana line.

During the year the Alberta Government gave a special permit for the export of gas from the Pakowki field, southeast Alberta, to Montana and a pipeline was built. The Alberta gas will go to the lines of Montana Power Company from wells of McColl Frontenac-Union Oil of California in Alberta to be used in plants of the Anaconda Copper Mining Company, under a joint U.S.-Canadian defence agreement.

#### **Natural Gas:**

During the year 1951 Lethbridge and district saw considerable expansion in the natural gas industry. Extensions were made in many sections of the distribution plants and 577 customers were added to the line. The metered consumption of gas for the year was 4,145,361 M.C.F., an increase of nearly 11 per cent over 1950. The Provincial Government has decided against the export of natural gas from the province until there are proven reserves to take care of Alberta's needs for the next thirty years. If and when it is proved that there are adequate reserves to serve Alberta for the next thirty years the export of gas will be permitted. This has been acclaimed by layman and expert alike to be a wise and farsighted policy that will result in the best use of this very important of natural resources.

#### **TRANSPORTATION**

Lethbridge is the divisional headquarters of the Lethbridge division of the Canadian Pacific Railway Company, with direct connections to Vancouver. It also connects with the main line at Calgary and Medicine Hat, and is a focal point for other localities north and south. The Greyhound Bus Lines offer a similar service which is supplemented by the smaller bus companies. Lethbridge is also serviced by the Trans-Canada Airlines with north connections to Calgary, Edmonton, and Alaska, while the Western Airlines supplies a service to Great Falls, Salt Lake City and Los Angeles.

#### **MISCELLANEOUS**

##### **The Lethbridge Chamber of Commerce:**

The Lethbridge Chamber of Commerce was organized in 1889, with C. A. Magrath as its first president, and it has always played a leading part in city's progress. Information on questions relating to the city and district is available at all times through the office on the mezzanine floor of the Marquis Hotel.

There is also a very active Junior Chamber of Commerce which was organized in 1945. It participates in many projects of a community nature, an outstanding example of which is the fine film projection service which it operates in co-operation with the Lethbridge Public Library, making available to all community organizations a varied program of films. It also has a plan of self development for its membership which is exemplified in its public speaking training classes which have been acclaimed best amongst junior chambers of Alberta.

**Living Conditions:**

Lethbridge is noted for its wide streets and neat appearance. Ample sunshine, more than anywhere else in Canada where records are kept, and mild winters, make for ideal living. This is proved by the number of people choosing this city in which to retire. Ample supplies of coal and natural gas are available for cooking and heating. Electrical power is supplied by the Municipal Power Plant, which also augments the power supplied to Southern Alberta by the Calgary Power Co.

In 1952 there will be installed an additional 5,000 K.V.A. generator at a cost of \$270,000, to take care of the ever-increasing demand for power in Lethbridge. Building in the city is controlled by a zoning by-law and a Town Planning Commission ensures the orderly growth of the city.

**Educational Facilities:**

Lethbridge is well-equipped to send its youth out into the world well educated. There are three high and nine elementary schools. Two new schools costing \$600,000 will be built in 1952.

The Public Library is well stocked with books and periodicals and is under the supervision of a qualified librarian. A large addition costing \$80,000 was added in 1951. Here too, is found a Record Library, the latter serviced by the Junior Chamber of Commerce. The Gurney Museum in Galt Gardens is known far and wide for its collection of historical relics and specimens of wild life.

**Health and Social Services:**

The city now possess two general and one isolation hospital. A new hospital is projected. St. Michael's Hospital built a large addition in 1951 at a cost of \$200,000. The City Health Department is under the supervision of a local physician and has a staff of four. The Nursing Mission renders an invaluable service to the community, nursing and ministering to under-privileged children and carrying out welfare work in general.

**Recreational Facilities:**

There are ample facilities for recreation in Lethbridge. Playground facilities are sponsored by various service clubs, covering summer and winter sports. There are many sites set apart for parks and these are being developed from year to year. For organized sport there are three ball parks, two golf courses, a soccer field and a privately-owned artificial ice arena, a civic curling and skating rink with artificial ice as well as facilities for boxing, basketball and badminton in the Civic Sports Centre. There is a Y.M.C.A. which carries on the best traditions of that organization. As well as providing recreational and cultural facilities for boys and girls of Lethbridge, the Y.M.C.A. provides room accommodation for young men. A Y.W.C.A. with rooming and boarding facilities for 45 girls is available. There are many cultural groups devoted to the arts as well as social clubs and lodges, etc. The city recreational programme is looked after by a full-time director employed by the city and under the guidance of a Recreation Commission.

Waterton Lakes-Glacier International Peace Park is within easy driving distance of Lethbridge, and many citizens have built summer homes within the confines of the park. This is a popular resort for Canadians and visitors from the U.S. because of the varied opportunities for holiday relaxation. Here one can boat, fish, ride, hike, camp and swim amidst the almost unbelievable beauty of the Rocky Mountains.

**CIVIC CENTRE**

Proof of the faith of the citizens of Lethbridge in the future is shown by the setting aside of a four-block area in the heart of the city for a Civic Centre. The first building erected was the \$250,000 City Hall. This was followed during 1949 by the Fritz Sick Memorial Swimming Pool and Sports Centre. Part of the cost of this building was paid for by \$100,000 donated by Mr. Fritz Sick, a late resident of this city. The balance of \$250,000 was borne by the city. A hockey, skating and curling rink was built in 1950 at a cost of \$240,000, and a Provincial Government Court House will be completed in 1952. None of the the Civic Buildings have any bonded debt.

**Summary:**

Lethbridge itself is growing rapidly and according to the 1951 Dominion census, the population is 22,281. The rapidity of the city's growth is evidenced by the fact that in 1951 permits were issued for 231 houses and demands for accommodation continued unabated. 1951 was an excellent year for Lethbridge itself. All phases of its economic and social life showed healthy growth and forward movement. With the extension of irrigation and the subsequent influx of industry and population, this forward movement is bound to continue for many years to come, and the feeling prevails that this city and territory which it serves is in an excellent position to meet any readjustment in our economic life that might occur.

The City of Lethbridge has ten hotels, six banks and a treasury branch, four theatres, three high and nine elementary schools. A new grade school and a junior high school will be erected in 1952. There are now twenty-two churches and places of worship in Lethbridge. Many churches have ambitious building programs planned or under way. It is the district headquarters for the Science Services of the Dominion Dept. of Agriculture and the Experimental Farm Services of the same department. The Science Service Laboratory is one of the largest establishments of its kind in the Dominion. The city is also the headquarters for the Provincial District Agriculturist, and the District Court of Southern Alberta.

## **Educational Information**

### **LETHBRIDGE PUBLIC SCHOOL TRUSTEES**

Elected at large. Meets every second and fourth Thursdays in Board Room, Junior High School, 15th Street South and Fourth Ave.  
Office—Junior High School, Phone 3548.  
Secretary-Treasurer—A. J. Watson, B.A.  
Superintendent—L. H. Bussard

#### **Bowman School Annex of Central School**

n. s. Fifth Ave. S. bet Eighth and Ninth St. S.  
Vice-Principal—Agnes D. Davidson

#### **Central School**

Ninth St. S. bet. Fifth Ave. S. and Sixth Ave. S.  
Principal—J P Watson

#### **Fleetwood School**

9th Avenue South and 12th Street South  
Principal—G. S. Lakie

#### **Galbraith School**

n. s. 9th Ave. North and 15th St. N.  
Principal—F. J. Clark

#### **Allan Watson School**

21st Street South and 6th Avenue South  
Principal—C. A. Larson

#### **Susie Bawden School**

12th Street South and 9th Avenue South  
Principal—G. S. Lakie

#### **Hardieville School**

e. s. 13th Street North at 4th Ave. (Hardieville)  
Principal—Sverre Solberg

#### **Lethbridge Junior High School**

15th Street South bet. 6th and 5th Avenues South  
Principal—G. C. Miller

#### **Westminster School**

e. s. 5th Avenue North  
Principal—James M. Wishart

**LETHBRIDGE COLLEGIATE INSTITUTE**

5th Ave. and 18th St. South

Principal—D. S. A. Kyle, B.A.

**CATHOLIC SEPARATE SCHOOL TRUSTEES**

Secretary-Treasurer—E. S. Vaselenak

**St. Aloysius Convent**

520 18th Street South

Superior—Sister Mary Edith

**St. Basil's School**

w. s. 12th Street B North near 7th Ave. North

Principal—E. S. Vaselenak

**St. Joseph's (R.C.) High School**

18th Street and 5th Ave. South

Principal—Rev. Sister Fortier

**St. Patrick's School**

905 4th Avenue South

Principal—Kathleen Roy

**LETHBRIDGE SCHOOL DIVISION NO. 7**

704 3rd Avenue South

The division administers schools in the area contained mainly in the Barons and Warner Municipality.

Five trustees constitute the Board, each selected for the twelve or more school districts in his subdivision. The Board meets the third Tuesday of every month.

Members of the Board are as follows:

Subdivision 1—E. Davidson, Coaldale

Subdivision 2—R. Court, Diamond City

Subdivision 3—J. R. Salmon, Picture Butte

Subdivision 4—H. Miller, Lethbridge

Subdivision 5—George Moreland, Wrentham

**Officials**

Chairman—George Moreland

Secretary-Treasurer—R. M. Glover

Superintendent—E. C. Miller, B.A.

Number of operating rooms 139.

**More than  
ninety per cent. of  
all advertising mediums  
are discarded before  
they're a year old**

---

---

After the new ones come out  
your advertisement in the di-  
rectory is still good, for old  
directories are seldom dis-  
carded while they hold to-  
gether. Years later many of  
these directories will still be  
in active use. Your advertise-  
ment is still in service

**Do you want LONG-LIVED advertising?**

**HENDERSON DIRECTORIES LIMITED**

# Common Sense

## About City Directory Circulation

**THE TRUE VALUE** of advertising circulation is circulation consulted.

**TO BE EXACT**—by actual survey in Canadian cities—for each City Directory, an average of three and one-half consultations were made for each business day.

**TO BE CONSERVATIVE** we will eliminate the sixty Sundays and Holidays when no tests were made.

**FOR EVERY THOUSAND DIRECTORIES** sold there will be an average of three and one-half daily consultations for each book for three hundred and five days, therefore—

$$1000 \times 3\frac{1}{2} \times 305 =$$

**1,067,500**

**Consultations or  
Circulation Consulted**

# **Please! Do Not Lend Your CITY DIRECTORY**

## **IT COSTS YOU MONEY Every Time It Is Loaned**

The practice of lending your City Directory, in a great measure, is responsible for the increasing cost of Directory Service.

The reason is:—

There is a definite cost involved in the making of the Directory of Your City.

This cost must be absorbed by the subscribers—be they one—or be they 1000.

If there were but One Subscriber to the City Directory—the One Subscriber would necessarily have to absorb The Whole Cost.

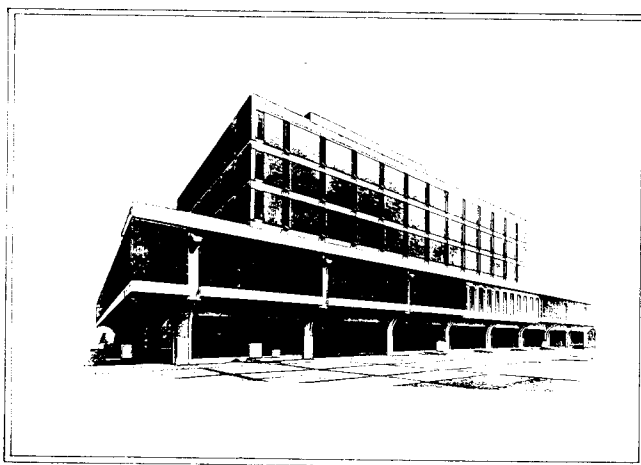

If there were 1000 Subscribers each one would have to absorb 1/1000 Part of the Whole Cost.

From which it is obvious that the Greater the number of subscribers—the Lesser the cost to each.

Every time you loan your City Directory the Less Necessity There is for the Borrower to subscribe for the Service.

More Borrowers result in fewer Subscribers, which means Increased Cost.
